

This module implements a basic meteorite global hazard.

There is only one code: **climada\_meteorite\_hazard\_set**  
and **help climada\_meteorite\_hazard\_set**

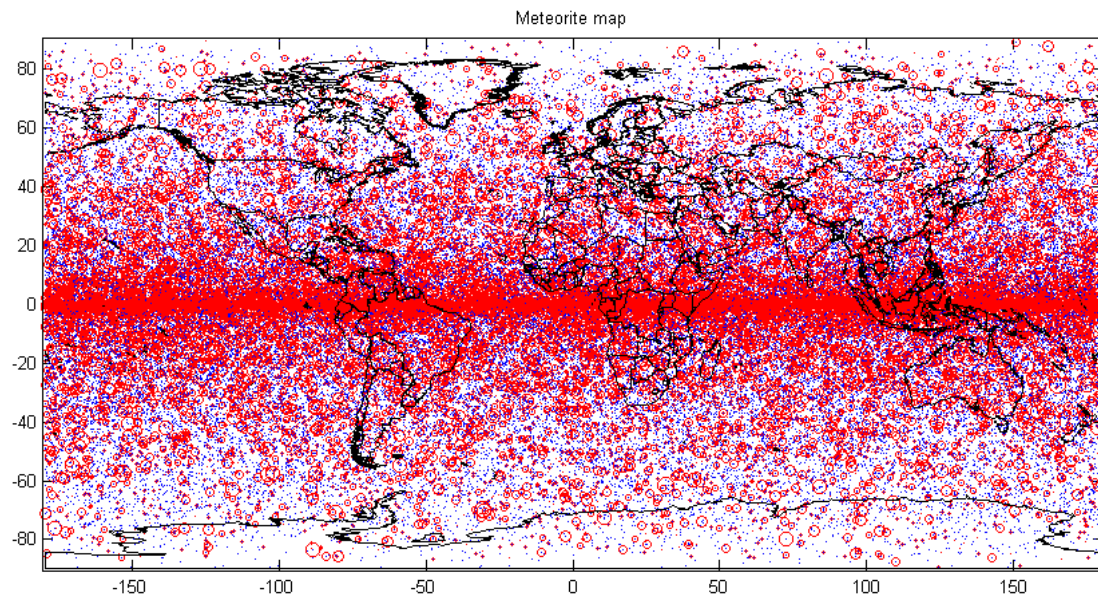

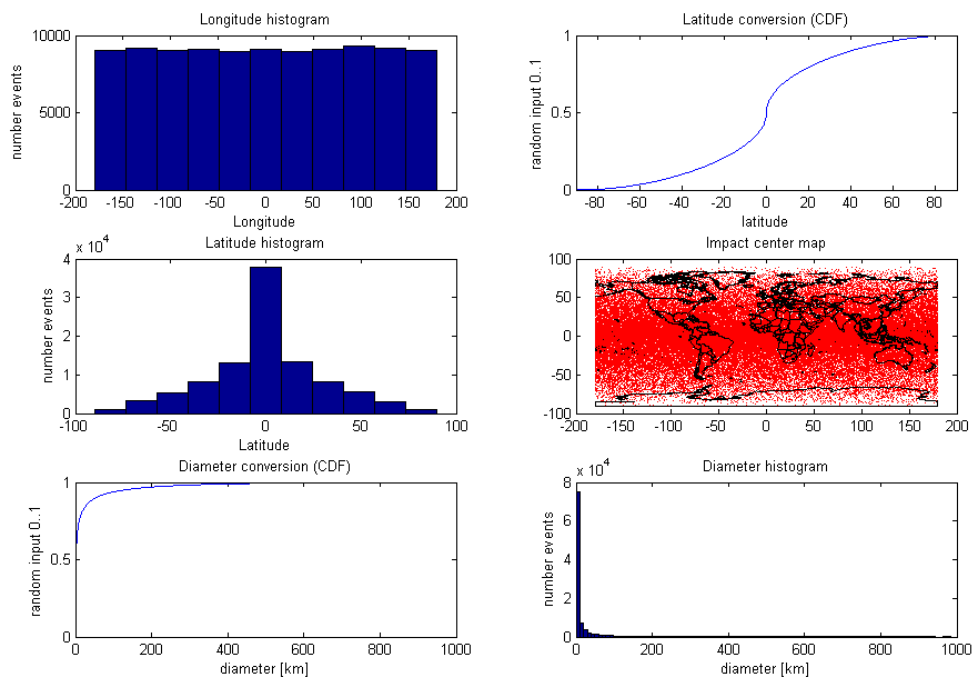

Figure: The basic meteorite events (plotted as blue dot per impact, red circle for magnitude)

<sup>1</sup> Renamed from climada\_module\_meteorites 20151224

Figure: The panel as produced by the code to check for distribution of key parameters. See code for details.
